## TURKEY TRACK TO CLOSE OUT SOON

Famous Ranch Near Artesia  
to Go Out of Business; Cat-  
tle All to Be Gathered in  
and Sold.

Artesia, N. M., Oct. 17.—It is un-  
officially stated here that the big  
Turkey Track Cattle ranch, one of  
the largest in the business, has de-  
cided to close out and all the cattle are  
being gathered in and shipped out of  
the country. The managers say that  
they have not made any money for  
years and that the ranch is a loss.  
The large Montana ranch, owned by  
the same people, was sold out about a  
year ago. When their ranch here in  
New Mexico is sold, they will have  
wound up their cattle business. The  
Turkey Track is one of the best pieces  
of property in this entire country, and

has an excellent system of windmills.  
The property lies out east of Artesia.  
One bid that they received was \$250,000  
for the land and water rights, and  
this may be accepted, though  
this is very cheap. The present owners  
intend to close up everything by the  
first of December or earlier if possible.  
Ed Tyson, the manager, will  
remain here where he has large in-  
terests in this section in land and out-  
fits. He is thinking of bringing in  
the cattle about ten thousand Mexi-  
can steers soon. This will add con-  
siderable to the valley's cattle.

"There's one of the wisest men I  
ever met."  
"He does seem to be mighty well  
informed."  
"Well informed? Why that man  
actually knows almost as much as  
Senator Bailey thinks he knows."  
—Chicago Record-Herald.

"Yes, the property is cheap enough.  
Why do you want to sell it?"  
"You won't give me away?"  
"No."  
"Well, sir, it's because I'm the only  
man in this neighborhood that doesn't  
move in high society, and I'm in-  
vulnerable."  
—Chicago Tribune.

## TOBACCO CROP IS SHORT IN EAST

Indications in Kentucky,  
Which Produces Large Part  
of Supply, Imply That  
Prices Will Be Higher.

Louisville, Ky., Oct. 17.—Indica-  
tions are that not only will the Bur-  
ley crop be short this year, but that  
the cheaper grades of tobacco also  
will not be so plentifully produced  
as last year, and that there will be a  
corresponding increase in prices.  
It is estimated that the tobacco  
crop of 1911 will be about 20 per  
cent short of the crop of 1910. In  
Kentucky there are varying state-  
ments as to the condition of the crop.  
While some of the counties report it  
to be "the finest ever," others report  
damage which has to some extent af-  
fected the quality of the product.  
It has been anticipated all along  
that the Kentucky production would  
be considerably short of the crop of  
1910. That may be true without in-  
fluence affecting Kentucky's pro-  
duction as a tobacco-growing state. The  
prices in the Burley region last year  
were not such as to justify a bumper  
crop in that section of the state. The  
situation was better in the dark to-  
bacco districts, where the growers or-  
ganizations have been working to-  
gether to the advantage of the in-  
dividual growers whether he be a grower  
or a non-grower. These organizations  
are now fixing the prices of the 1911  
crop, which is generally good in the  
Black Patch and is expected to sell  
at a material advance over the figures  
which prevailed last year.

The United States department of  
agriculture in its October report es-  
timates the area planted in the entire  
United States at 93,200 acres, which  
is 12.4 per cent of the acreage of  
1910. The condition is placed at 89.5  
per cent of normal, compared with  
89.3 per cent last year and a ten-year  
average of 89.4 per cent. The indi-  
cated yield per acre is 801.4 pounds  
as compared with 197.8 pounds last  
year and a five-year average of 826  
pounds.

While the Kentucky crop is smaller  
in quantity there is reason for believ-  
ing that it will average better in qual-  
ity than the crop of 1910. It may be  
that what is lacking in quantity may  
be counterbalanced by this improve-  
ment in quality and that the returns  
for the crop of 1911 will equal or ap-  
proximate the amount for which the  
1910 crop was sold. In that event  
there would be no cause for regret  
over the failure to produce a bumper  
crop.

Do you know a reliable dealer in  
automobile tires? "Yes." "What's his  
name?" "Shidmore." "Umph! Tell me  
some one else."—Birmingham Age-  
Herald.

## REVOLUTIONIST IS IN THIS COUNTRY

Mexican Police Search for  
Refugee, but He and His  
Men Are at Hotel in Doug-  
las and Cannot Be Touched.

Douglas, Ariz., Oct. 17.—Francisco  
Escobedo, the leader of a dissatisfied  
band of political malcontents in the  
state of Sonora, Mexico, is in Doug-  
las with a band of forty adherents,  
all armed, stopping at the Inter-  
national hotel. Mexican troops have  
been hunting Escobedo in the moun-  
tainous country of Sonora, and his ar-  
rival here was a complete surprise.  
He states that if the Mexican gov-  
ernment will guarantee he remains,  
his men will lay down their arms.

The leader of the rebel band gave  
out a signed statement tonight in  
which he declared that the new gov-  
ernment, after it had been installed  
in power, called an election in Son-  
ora for governor and vice governor.  
"Don Jose Maytorena was selected  
governor and Don Francisco de P.  
Morales vice governor by 23,000 ma-  
jority," continued the statement.  
"Then congress, when making a count  
of returns, declared Senor Gayoso to  
have been elected vice governor. The  
people indignantly protested but  
obtained nothing except imprisonment  
for several members of our club. For  
this reason I with several others  
raised an armed force and proclaimed  
Senor Morales vice governor. This  
was on September 1. There have  
been many encounters since between  
the soldiers and our side, in most of  
which we were successful until over-  
whelmed by numbers. There was  
nothing else for us to do except to  
flee. That is why we crossed the  
border into the United States.

DEAFNESS CANNOT BE CURED  
by local applications, as they cannot  
reach the diseased portion of the ear.  
There is only one way to cure deaf-  
ness, and that is by constitutional  
remedies. Deafness is caused by an  
inflamed condition of the mucous lin-  
ing of the Eustachian tube. When  
this tube is inflamed you have a ram-  
bling sound or imperfect hearing, and  
when it is entirely closed, deafness is  
the result, and unless the inflamma-  
tion can be taken out and this tube  
restored to its normal condition, hear-  
ing will be destroyed forever; nine  
cases out of ten are caused by Catarrh,  
which is nothing but an inflamed con-  
dition of the mucous surfaces.

We will give One Hundred Dollars  
for any case of Deafness (caused by  
catarrh) that cannot be cured by  
Hall's Catarrh Cure. Send for cir-  
culars free.

Take Hall's Family Pills for consti-  
pation.

## SANTA FE SYSTEM ACQUIRES NEW TRUCKAGE

A. T. & S. F. Takes Over Hold-  
ings of Sunset Western Rail-  
road in California; Permis-  
sion of S. P. Granted.

Bakersfield, Calif., Oct. 17.—The  
Santa Fe is making ready to take  
over the management of the Sunset  
Western railroad in the near future,  
under the joint agreement with the  
Southern Pacific company. The Sun-  
set Western taps the Maricopa-Mul-  
waa field and also reaches the Palo-  
Verde-shale district.

The acquisition of this important  
right of way marks another step in  
the net work that this system is weav-  
ing over the entire southwest. The  
recently built and opened up Colton  
cut-off shortened the route by several  
miles, and made possible the stopping  
of several hours from the coast to  
east schedule. The Santa Fe man-  
agement intends to cut this round-  
trip considerably within the next  
few years, offering the fastest trans-  
continental service obtainable.

## NO MORE RACING IN NEW YORK TRACKS

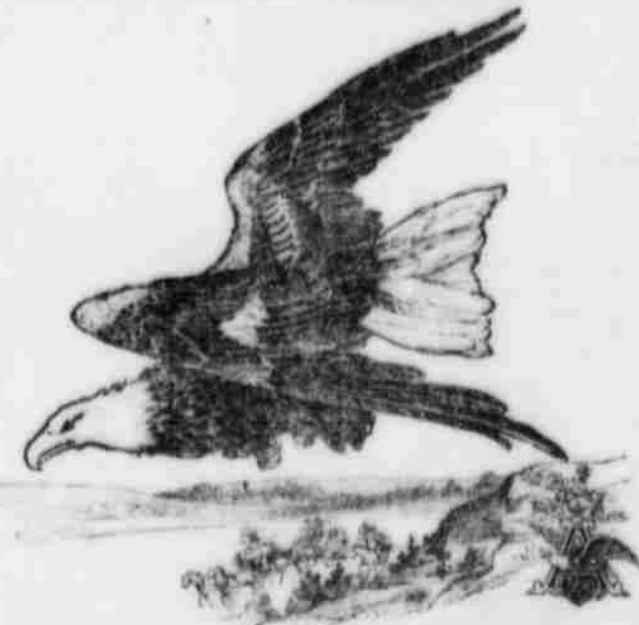

Gotham Horsemen Give Up  
All Hope of Conducting  
Meets; Aqueduct and Grave-  
send Tracks May Be Sold.

New York, Oct. 17.—Turfmen here  
have about come to the conclusion  
that racing will not be legalized in  
the near future. Phil Dwyer, presi-  
dent of the Brooklyn Jockey club,  
said yesterday:

"There will be a meeting of our  
club Friday which will decide whether  
we shall hold onto the Gravesend  
track, which we own, or shall give it  
up and allow it to be cut up into  
building lots.

"I shall advise the Jockey club to  
sell the track, for, in my opinion,  
horse racing cannot come back in-  
side of two or three years, and I  
think we'd be better off getting some  
return from the track by way of a  
sale rather than letting it idle."  
The Queens County Jockey club,  
which is also headed by Phil Dwyer,  
and which owns the Aqueduct track,  
will probably be faced soon with the  
same situation that is now confront-  
ing the Brooklyn club. Dwyer, when  
asked about this, said:

"I do not know what will be done  
about the Aqueduct track, but it prob-  
ably will be sold the same as Graves-  
end."

## POSTAL SAVINGS BANK OPENED IN CARRIZOZO

(Special Correspondence in the Herald)  
Carrizozo, N. M., Oct. 17.—The Car-  
rizozo postoffice opened up a postal  
savings bank department last Sat-  
urday morning, October 7, and that de-  
partment will continue hereafter to  
be one of the features of the local  
postoffice. L. E. Chase was the first  
depositor and Frank Gorney the sec-  
ond in the line Saturday morning.

The Facts—"He alludes to himself  
constantly as a self-made man." "Yes,  
once when he was about 14 he sold  
papers for two or three days."—Kan-  
sas City Journal.

# The Opinion of a Kansas Man

## Is a Cure of Tuberculosis Effected Through the Use of Tubercleicide Treatment a Permanent Cure?

The following letter from one of our patients written EIGHT months AFTER his re-  
covery, and after he had spent ONE trying winter in Kansas, ought to convince the most  
skeptical upon the above point.

When we opened the present offices of the TUBERCLECID COMPANY OF ARIZONA, in Phoenix, on January 5, 1911, we published a letter written October 10, 1910,  
by Robert G. Knight, of Florence, Kansas, who had used TUBERCLECID here in Phoe-  
nix four months, and then returned to his Kansas home to engage in business.

Mrs. Sena Lowe, of Tucson, read Mr. Knight's letter, and at once wrote to him to  
know if his letter, as published by him, was true. She received the following reply:

Florence, Kansas, March 29th, 1911.

Mrs. Sena Lowe, Tucson, Arizona.

Dear Madam: I received your letter inquiring about the TUBERCLECID TREATMENT. My letter, as  
published, is true and I am as well today as I have ever been in my life, and it is now EIGHT MONTHS  
since I was pronounced well of Tuberculosis by bacteriologists, who could find no trace of Tubercle bacilli in  
my system after the use of TUBERCLECID treatment. The treatment is not hard to use nor is it possible for  
it to injure the stomach.

I have a sister-in-law that has been cured in the last six months of such consumption by the use of  
TUBERCLECID treatment. She commenced using the treatment six years ago when she knew that she had the  
disease, and although her doctor didn't give her any encouragement about getting well when she first began  
taking the treatment, but now she is well and doing her own housework. TUBERCLECID will cure any one  
who will take it in time, and use it according to instructions and see experts to get well in 30 days. It takes  
months to cure consumption, but TUBERCLECID will do it if used with patience and perseverance.

If I had known of the treatment before I went to Phoenix, Ariz., I never would have gone, as you can get  
well as quick as home, and in one climate as well as another.

With best wishes for your health and complete recovery, I am, very truly yours,

ROBERT G. KNIGHT.

P. S.—We now have more than ONE HUNDRED PATIENTS using TUBERCLECID under the Phoenix  
office, we are in a position to refer you to these patients, and many of them are your neighbors. All we ask  
in an investigation of what the treatment is doing. If TUBERCLECID will cure others why will it not cure you?

Albuquerque Office, 44-45-46 Barnett Building

TUBERCLECID CO., OF ARIZONA

Phoenix, Arizona.  
Gentlemen:—

In the spring of 1903 I contracted a heavy cold which clung to me throughout the summer. I had always  
been strong and healthy and did not regard the cold as alarming until in the fall I noticed a loss of strength  
and then had a hemorrhage of the lungs. I coughed all through the winter of 1903 and my strength gradually  
slipped away. During the summer of 1909 my strength left me and I was subject to a succession of colds which  
further weakened me. In December of that year I had a number of hemorrhages and these continued until  
February when Dr. P. W. Robertson of Oskawatomie told me if I did not want to die of consumption I should  
seek a mild climate. He recommended Arizona and I went to Phoenix.

Dr. Louis Bryant of Phoenix diagnosed my case as pulmonary tuberculosis. He said that the most serious  
trouble was at the apex of the left lung. I had three hemorrhages after reaching Phoenix. My temperature  
ran up each day and I was further weakened and weakened by night sweats. My throat was affected at times  
and I also suffered intensely from pleurisy. In fact my case seemed to be running the general course of those  
doomed to die of consumption.

In May, 1910, I began TUBERCLECID treatment. At that time my vitality seemed at its lowest ebb.  
Despite the ups and downs that doubtless occur to all who fight against the disease, I steadily progressed to-  
wards recovery. My cough gradually diminished and my strength returned. The pains in my chest disappear-  
ed. The spasm died down and was light and true. Examinations showing decrease of tubercle bacilli  
greatly encouraged me.

I was so much improved by July 1st that I was able to leave Phoenix and travel. I really felt stronger  
upon my arrival at Colorado Springs than I did when I started from Phoenix. I have gained twenty-five  
pounds in weight and have resumed my business. At the end of three months' treatment, bacteriologist test  
showed no trace of tubercle bacilli in my sputum. I have entirely recovered from the disease.

This is written to tell you how thankful I am for the close attention you gave my case and for your val-  
uable service and sympathetic letters. Words cannot express my appreciation of what you have done for me.  
My friends here are surprised to see me restored to health and looking better than I ever did before.

I shall be glad to talk or write to any sufferer from tuberculosis and tell him of my remarkable cure. I  
hope in this way to be the means of saving others from the fate that so nearly overtook me.

(Signed) ROBERT G. KNIGHT.
